TRACK & TRACE- TRAINING

As unique as your product

TRAINING AT THE TRACK & TRACE ACADEMY – EFFICIENT AND TAILORED TO YOUR NEEDS

OPERATOR	KEY USER	SPECIALIST	AGGREGATION	ADMINISTRATION
Covers basic needs. The training describes the basic hardware and software functions of the system. It also explains the most important functions for starting, stopping or interrupting a job. Basics of report generation are taught.	Key user and specialist training are based on the operator training and deepen the knowledge. Application of serialization with Traxeed software and hardware solutions. We are happy to adapt the training to your specific workflow.	In addition to key user training, specialist training covers topics such as tampering and handling other optional equipment.	Here the responsible operators are specially trained for traxeed aggregation solutions.	This training builds on the previous modules and focuses on level 3–5 solutions. It targets users who take responsibility for databases, serial numbers and planning of order processing.
For operators who need to master the basic functions of the machine safely.	Operators who are available as first contact partners.	Transfer of specialist knowledge.	For operators who also work at the aggregation station.	For level 3–5 specialists.

YOUR TRAINING – EFFICIENT AND TAILORED TO YOUR NEEDS

At Traxeed, we help you get the most out of your Traxeed Track & Trace system to achieve the earliest possible return on investment (ROI).

Graduated, sequential training modules based on a holistic training concept provide all the necessary information.

	OPERATOR	KEY USER/ SPECIALIST	AGGREGATION	ADMINISTRATION
RECOMMENDED PARTICIPANTS	Every operator of your Traxeed Track & Trace solution	Selected key users + system specialists and QM employees	Selected key users + system specialists and QM employees	IT employees + specialists for planning, databases or connection to level 3—5 systems
DURATION	1 day	Operator Training + 2 Days Key User /+ 3 Days Specialist Training	Operator + Key User/ Specialist + 1 Day Aggregation	2 days training
TRAINING LOCATION	At the customer's location or at the Traxeed Academy on request	At the customer's location or at the Traxeed Academy	At the customer's location or at the Traxeed Academy	At the customer's location or at the Traxeed Academy
CONTENT	Simple operator tasks for processing orders on the production line	All parameters and devices necessary for processing an order	Aggregation topics concerning hardware and software	Level 3 systems and their connections to databases and level 4 solutions

USING THE TRAINING

The tried and tested training concept ensures that participants receive high-quality training that is tailored to their requirements and practical applications. After the training, the participants are able to combine their newly acquired knowledge with already existing knowledge in order to be

even safer in operating the systems. Through interactive training design with thorough explanations of all topics and questions, the participants are quickly able to use the newly acquired skills in the production process after the training.

CROSSLEVEL TOPICS

- Track&Trace principle, serialization
- Individual and plant-specific training

THE TRAINING ENVIRONMENT AT THE TRAXEED ACADEMY

In our training environment you will find state-of-the-art Traxeed equipment in an engaging setting that allows participants to learn without distractions.

Participants benefit from this framework: they can test and deepen their knowledge and skills in the various production scenarios seen through diverse training topics and exercises.

The training programs take into account the previous knowledge of the participants as well as special on-site requirements in production. Comprehensive theory combined with numerous practical exercises provide the ideal basis for an outstanding performance when operating the systems in your production.
