TRAXEED
KÖRBER SOLUTIONS

ALL FROM ONE

The real one-stop-shop solution for serialization!

"IN OUR SERIALIZATION PROJECT WE HAD SOME TOUGH LUCK AT THE BEGINNING. WITH THE TRAXEED TEAM, THERE WAS IMMEDIATELY A NEW CONFIDENCE LEVEL IN THE PROJECT TEAM ..."

CLIENT PROJECT MANAGER

THE TOPIC

In May 2018 we were called to a meeting to a customer's site. The client quickly adressed a concrete question to our team: Can Traxeed communicate with a specific third party Level 2 solution, which was in place already on one line? The other solution was from a supplier who decided to drop the serialization business, which of course lead to a certain level of uncertainty with the client.

During the meeting the Traxeed team clearly understood: this client needs a reliable partner with deep serialization expertise across all levels. Talking about our tremendous experience across all five levels of serialization and aggregation, the atmosphere in the meeting completely changed. Mutual trust was established just within one afternoon! At the end of the meeting the clients' new request was verbalized:

"Traxeed – can you please ensure that level one to five is up and running on my premises?"

Of course Traxeed can.

"Pharma. Competence. Combined." is not just a slogan to us. All involved Traxeed players know pharma inside out, as Traxeed's clients are almost exclusively from this industry.

With this in mind, the plan was designed and, like the wind, approved.

- Upgrade of line one with Traxeed equipment
- Complete new line two, with ItemUnit, CaseUnit, and PalletUnit, the Traxeed Multi Line Manager (MLM), plus communication to business partners.

The complete validation documentation was delivered as part of the project by Traxeed as well in order to provide the full services. This was reviewed by another specialized company, and was well appreciated.

After the initial set-up, the Traxeed team as well took care of the onboarding of the clients' business partners to the new IT-serialization environment.

ACCOMPLISHMENTS

- New concept for client under time pressure (deadline in Europe)
- Quick delivery of all necessary components
- Traxeed domain expert taking care of project execution
- Provisioning of validation documentation
- Onboarding of business partners
- Training and training documentation
- Go-live support
- Hypercare

"In our Serialization project we had some tough luck at the beginning. With the Traxeed team, there was immediately a new confidence level in the project team, as everybody in the team realized that this will become a success. And the good thing about it: it proofed to be true. I'll surely rely on Traxeed for upcoming serialization and aggregation projects."

– Client Project Manager

The client is now running serialization at full speed, aggregation will be added on top in Q2/2019.

Traxeed Multi Line Manager

The Traxeed Multi Line Manager Web is a configurable web-based software solution. It manages data and information for connected Traxeed Line Controllers or Item Experts used in production.
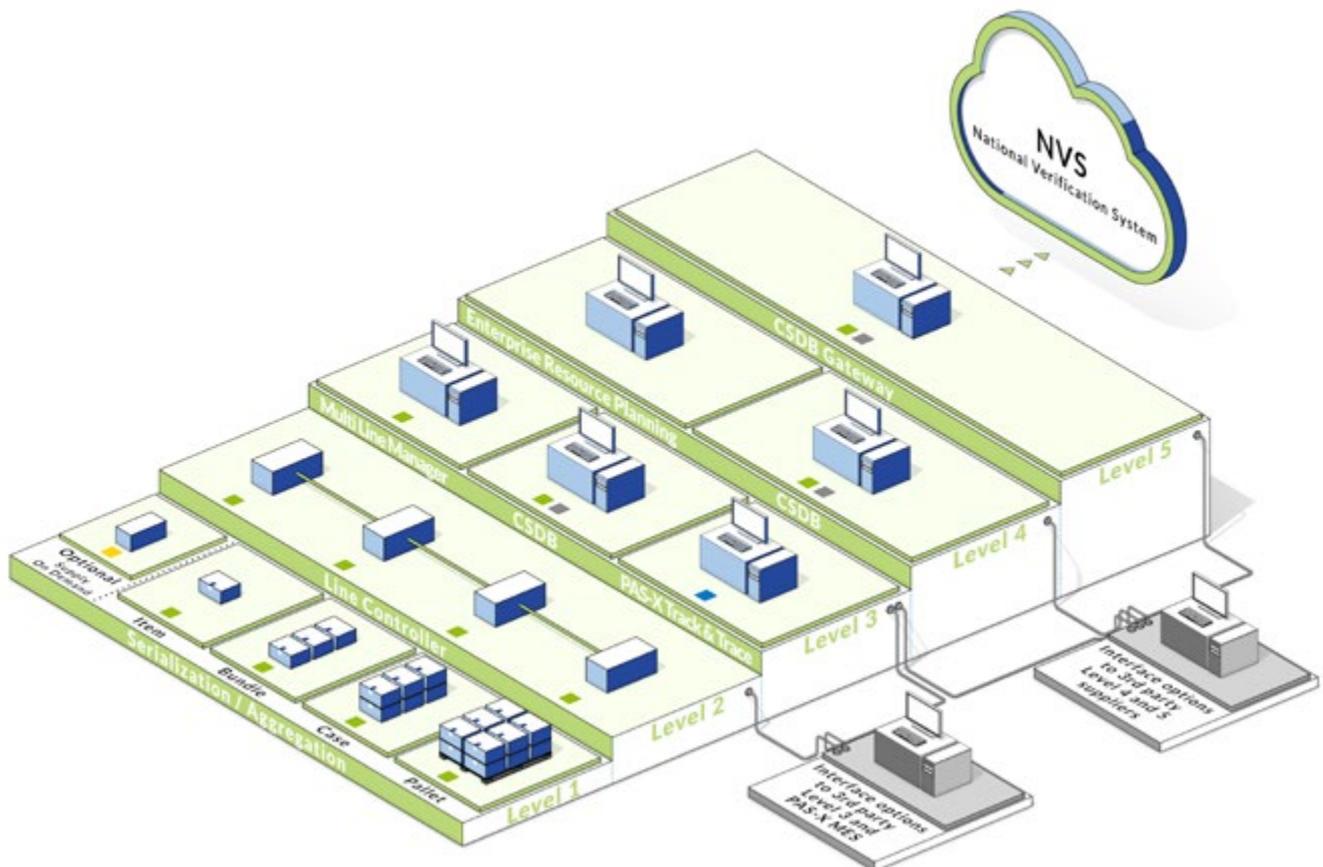

The Traxeed MultiLine Manager Web displays actual batch data for each connected production line component, and manages all required data centrally on a server. Besides the communication with the Traxeed Line Controllers or Item-Experts, the Multi Line Manager Web also exchanges data with superordinate systems like Arvato CSDB, SAP ATTP, SAP ICH, Tracelink and other ERP or MES.

Arvato CSDB

Arvato CSDB provides a flexible and scalable solution for your coming serialization requirements. With extensive know-how from many serialization projects, this solution is scalable in order to meet the needs for large corporations, medium-sized companies, or single-site CMOs. The system is capable of connecting to various systems, internal and external.

Traxeed CaseUnit-Top Layer

The Traxeed CaseUnit-Top Layer is a manual workstation for aggregation, serialization and verfication of cases in the pharmaceutical packaging process.

The CaseUnit-Top Layer combines ergonomic element handling, high end vision technology for identification, label printing and label verification. Configurable software features with an integrated label designer make the system compliant with track and trace regulations worldwide.

Traxeed PalletUnit-Single Element

The Traxeed PalletUnit-Single Element is a manual work-station for aggregation, serialization and verification of pallets in the pharmaceutical packaging process.The Traxeed Palle-tUnit-Single Element combines element identification, label printing and label verification on smallest footprint. Configurable software features with an integrated label designer make the system compliant with track and trace regulations worldwide.

Traxeed ItemUnit

The Traxeed ItemUnit is a modular system for online coding, serialization and verification of single items in the pharmaceutical packaging process. It combines a precise product transport (four lane conveyors) with printing, vision control, reject system and the batch controller. Configurable software features with integrated label designer and automatic vision configuration based on the label design make the system compliant with track and trace regulations worldwide.
